49 Plant Religion

Ⓢ Paragraph - Don't teach you what to believe - you learn the truth for yourself

50 Plant Religion Most Neurotransmitters "are either chemical or functional copies of plant compounds.

Vegetal World, i.e. literally unbiological mother No difference

between human and plant biochemistry

57 250,000 people in N.A.C. 1/4 of Adult Indian Population

62 No accepted use? Was used Back in day

MEDICAL - Doctors Bleed, Blister, Purge, Puke, Salivate

68 Biggest Patent ~~meds~~ were Tinctures of Powerful Herbs
Some were very good and effective.

88 Witches Ointment Ingredients.

In Praise of Drug War

70 - Treatment of Opates (or Alc) ergot (LSD)

"Drug War is an amazingly entertaining read, and the most comprehensive look yet at the biggest mystery of our culture: why drugs are illegal, who profits, and who benefits... a tour de force of intellectual courage and honesty on a subject which encourages neither. In *Drug War*, author Dan Russell convincingly demonstrates that the current CIA-Drugs debate is part of a larger societal struggle between the forces of freedom and those of repression, and that the phony 'drug war' is really just a 'trojan horse' in the creation of what has been called 'friendly fascism.'" **Daniel Hopsicker, *Drug Money Times*: madcowprod.com; author of *Barry and the Boys***

317 Kennedy CIA

"An important, strenuously ~~argued~~ contribution to the case against our nation's scandalous narcotics policies and laws. Particularly valuable are the encyclopaedic historical and anthropological perspectives which the author brings to bear on our cultural crisis. His scathing review of today's unjust confiscation and sentencing statutes is balanced by encouraging and badly-needed statistics about the successes of alternatives, such as the Dutch decriminalization program." **Peter Dale Scott, English Department, University of California, Berkeley, author of *Cocaine Politics, Deep Politics, Crime & Cover-Up, Coming To Jakarta*, etc.: <http://socrates.berkeley.edu/%7Epdscott>**

"Russell provides a vibrant, detailed history of drug use and drug policy. This book should be studied by anyone working to develop a policy that works. It is obvious that we are currently repeating mistakes we have made in the past — hopefully this book will be widely read and more sensible approaches can be pursued."

"Russell's review of history shows that drug prohibition enforced by a war on drugs will not only fail, it will make health, crime and other drug-related policies worse. By learning from history we can break the spiraling cycle of extremist policies and enact more cost-effective approaches that create a safer and healthier America." **Kevin Zeese, Esq., President, Common Sense For Drug Policy: www.csdp.org**

"A very impressive piece of work! Your anecdotes are enjoyable, your breadth is magnificent, and the data are well-supported...A hard-hitting account that will disturb many of its readers, but may also expand their perspective by offering alternative options to what has become a no-win situation." **Stanley Krippner, PH.D., co-author of *The Mythic Path*, co-editor of *Broken Images*, Bro-**

226 Wow Eisenhower Totally Anti-Vietnam war.
