68 Role of Psychoactive Plant Medicines

Medicine, Psychology, & Religions Professions - fearful of psychotropics - Didn't want to use them - & didn't want anyone else to use them - or even research go on. Prohibition

Assumption - that people can't be allowed to make their own decisions about life, religion, medicine, psychology

When western society discovered psychoactive plant or food "use devolved from sacramental to recreational"

Tobacco, Cocq., divinity - "mama Coca" God's - sacramental

Cannabis - used by Sufis - Tantrics - Hindus - Now recreational

Then - Desecration of Plant ... followed by Criminalization

Book

sacramental plants - so rapidly, completely profaned on being

69 adopted by West's materialistic culture.

70 - Hoffman took the synthesized psilocybin to Maria Sabina.

 Left hand "path, descent" e.g. Left side is the feminine Goddess worshippers - delight in the senses, food, sexuality.
 79 Strong Western Center people to re-establish their connections with ancient traditions of knowledge - visionary consciousness, exploration of other realities.

 Attitude NOT shared by indigenous or poly theistic cultures
 Consequence: European distorted perspective of being above and apart from nature are being played out across the face of the globe.

 Cultures keep secrets; they illuminate some things and suppress others.

Every culture conceals as much as it reveals; that is its style and its distinctive contribution. Cultures survive as long as they can maintain that style, which means as long as they can hide from themselves. There is a sense in which every culture is a conspiracy, a coordinated effort to open a few doors of perception and to close others.

The natural environment has been excluded from mainstream psychological theory so totally that it might very well be a deliberate conspiratorial act. How could so vast a flaw go unnoticed except by collusive negligence? Let me, in fact, put the case as strongly as possible. The environmental disconnection of modern psychology is indeed a conspiracy: a centuries-long collaboration among the best and most authoritative minds in our society to keep human nature as distant, different, and disengaged from nature as possible.

It is only during rare periods of disintegration or strenuous transition that courageously inquiring minds have the chance to see through the "official secret acts" of their culture and take a greater perspective into account. This is obviously such a period. Over the past two to three generations, for reasons both internal and external, Western culture has
