

11 Deep Ecology is Bio Centrist

14 Cap. Society - based on competition and growth for its own sake must inevitably devour the natural world

16 - A powerful technology that has been put at the service of mindless growth

The world of life will be irreversibly undermined by a society gone mad in its need to grow.

Bottom 21 to p 22 Another great statement

27 - ^{children} "It is not only a human being that is being reproduced, but society itself"

28 Physically fragile human could not have survived without independence, mutual aid, empathy

32 - The Basic Problems that pit society against nature emerge from within social development itself, not between society and nature - Discussion - class

35 - Conclusion

We still cannot even imagine what human potential is.

39 - "Ecological problems have their root in social problems"

42 - Extent to which we preserve or destroy nature depends a lot on what kind of society we create.

46 - Conclusion Great Critique of Culture
As opposed to tribal
modern Capitalism
Towards Evolution -> Homo Erythraeus

71 useful Harsh critique of any EcoBased Religion
