

- Opening - Custom will never conquer nature
- 2 - Truth is independent of consequences
- 3 Feminist - arguments that deny the determinativeness of neuro-endocrinological differences → in institutions.
- 11 - Impossible a political authority system not ruled by men
- Femininity - women greatest strength for gaining feminist or dyadic power.
- 12 Woman associated w/ creation Not authority and leadership.
- 14 Patriarchy refers only to suprafamilial organization
- Male Dominance refers to the family or pair
- Has there been a matriarchy?
- Anthropologists have used matriarchy for societies that are both matri-linear and matri-local. Authority still vested in the male - as in prehistory & Amazons etc. More totally universal/assumed than The Family, Marriage or the incest taboo.
- 21 - Great Reason why - Matriarchal Society Never has existed.
- 28? Too far "There is a psychological factor which makes a Non patriarchal society impossible to achieve?"
- 31 - 5 tribes often seen as exceptions
- 35 - Margaret Mead - Claims about societies ruled by women are nonsense
- 37 - High Status Motivates males more strongly
- 38 "Care and rearing of the young - the most imp't function served in society or in nature itself."
- 49 - Universality does NOT imply inevitability - but may be in practice, as long as we are physiologically constituted as we are now.
- 52 - more Female heads of State in the 16th century than 20th
- 64 - Short Summary of the theory - Neuroendocrinological difference
- 65 - Tendency toward Attachment & Dominance - Rooted in Physiology
- 67 - It's a differentiation in tendency
- Motivation is determined by Physiology
- 75 - The environment that is necessary for patriarchy is inherent in society itself.
- 81 Perinaphodytes - can be raised F unless masculinization of the fetal brain (testosterone) has occurred.
- 93 Dominance Tendency - Sexual differences in are a function of testosterone and the hormonalization of the fetal brain (but what of the world where we contend by physical strength & how much does testosterone vary in women - in men)
- Environmental & familial situations may alter testosterone levels - like hierarchy change

- 99 Don't need Souls & Miracles - Those that need these man made "spirits" "Fail to see the dance of matter which has far greater beauty than any man made 'spirit' could possess.
- 100 - This sexual differentiation developed long before our species walked the earth
- No possibility of change? **WHY** our Psychophysiological Natures set immovable limits on human malleability and institutional possibilities.
- MEN**
- RULE**
- 103 - main error of older feminists - to tie their feminism to 100% environmentalism (Environmentalism determinant)
- 105 on Socialization - process by which society utilizes the reality of differentiated tendencies.
- 110 For the vast maj. of any society intellect works in the service of emotion.
- 112 There is "Discrimination" Because of the male's greater dominance tendency? If women were "put" in most positions of power or authority it is unlikely that stability could be maintained??
- 114 Patriarchy will continue until/unless biological adaptation leads to the disappearance of sexual hormonal differences.
- 114 Not self evident that women would devote as much to careers or jobs - to become dominant.
- 116 Top positions are few - will always be majority male - willing to make sacrifices
- The desire of some feminists that ~~the~~ males no longer dominate will never be realized.
- 123 STRONG - rel. between hormones and behavior.
- 123 Nonhuman Mammals - all male dominant - Not by socialization.
