

Dear River Mon

Hey is that River Mon - with an O?

Ya Mon - I just got back from Negril Jamaica, again
I loved teaching Kindergarten because it was so cool to be
with the kids. I graduated from college Magna Cum Laude -
Nearly All A's - I was thinking of whether to be a lawyer or a
professor - but really I was a wide eyed 60's radical who
preferred the world of 5yr olds and helper moms to anything that
relating to adults all day had to offer. I was so happy to stay in Kldg.
at Riverside for 33 years - and then follow my life plan of having
enough of a pension and staying fit enough to do politics full time.
I chose comabis politics because of personal involvement and
belief - and the abhorrent absurdity of destroying the lives of
American citizens over plants. I passed Ann Arbor Medical
Marijuana in 2004 and we passed it state wide in 2008.

Now ~~the~~ these guys have made me president of a dispensary
in Ann Arbor, I run a statewide list on the computer, & will
assemble a great conference in Sept.

It is difficult when you realize that life is so full of lies and
banality, but it is so full of beauty & good feelings and good
people too.

Read Books, Dont watch stupid TV, use the system to get as much
actual training in something as you can. Dont sort of hide from
hi tech - like I did, I'm afraid you have to embrace it these
days or you will perish. Try to think of something you like to
do (or sort of like to do) that makes money. Stay out of trouble
with the insane prison/industrial system of our country. You
will have to be nimble witted and do lots of hard learning
work that you might not really want to do to make it these
days. You might consider becoming a Kindergarten

teacher. But Teaching is hard because of the bureaucracy

But - Everything is hard.

Life is hard and then you die - but in many cases you get back what you put in, and there are so many opportunities for fun and pleasure and really meaningful work. Google Chuck Ream and Charles Ream - since I retired in 2004 I have Kicked Ass.

Figure out what your objectives are and try to get there, realizing that you will have to put up with some real jerks along the way.

Thanks for brightening up my life then and now.

Thanks for realizing that I was somebody Different and good. I am a patriotic American - but if I ever thought I had become "Normal" - in this culture, I might have to jump off a cliff.

Have a good Life; Work Hard
find pleasure, give love find love

peace to you River

Chuck Ream

A.K.A.

Mr. Ream
