Cont - bottom over
Survive with improved civilization where
people are wanted and are there for value and can
be brought up right, with care and attention.
Greatest Crime - Forced Birth bringing us those
who don't care (as they were not cared for
properly) and are the killers, robbers, addicts that
lower the level of civilization and bring us our police
and prison state / and never have to provide basic
human services to these extra, unwanted people
- who can be used as a cheap labor force and then
ignored / supported at absolute minimum.

There is nothing tentative or fragile as the Cannabis
plant bursts through the soil. It has proven itself
goodness, worth, sustainability, purpose

Humans who were once so tentative and vulnerable
then so all powerful. Now so tentative and
vulnerable again as our power over whenever and
we have no source, no ability to generate any
strength of real morality or wisdom of collective
wisdom. Unsustainable power over environment
is love of death. Fear of change - admitting great
cultural mistake - is far greater than reality
of wiping out all, causing great pain. / So they posit
"technology will find a cure" or - "so what - we're
leaving for rapture - The earth just vale of tears
Not of Value.

Now the humans and the Cannabis plant are
both at the extent of their range - nearly never
eradicated from a range they have held.
But the cannabis plant is still sure of its critical
nature the wholesome worth of its belonging - its
purity.

Humans have lost their way - but will follow pig-
headed fundamentalist monotheist male Sky
god killers to their doom

Unless we become joined again with the central
teaching plants of the mother force - which can help
to bring forth a collective consciousness of love and care
→ uncoupled from the dominance of the motivation
of the pure and selfish materialism we have today
Can never solve problems with the same form of
consciousness that got us in to them / get Higher and
Cannabis / Competence / Confidence / Better than mat.
survive.
